9 April 1965

MEMORANDUM FOR: Committee on Overhead Reconnaissance

SUBJECT: Current Satellite SIGINT Requirements

1. Attached for approval of COMOR and subsequent submissions to the Board are the SWG Current Satellite SIGINT Requirements. Representatives of the agencies met especially on 5 and 6 April to go over the paper making editorial and other changes. In its present state it represents their consensus except that the NSA suggests there may have been an oversight in paragraph 17 the subparagraphs of which should have been taken from COMOR -D-69/15 to read as follows:

c. The plans and capabilities of penetrating U.S. forces; and

d. The international situation, whether it is relatively quiescent or in a state of tension.

2. It would be appreciated if the members would advise the office of the Chairman by cob Tuesday, 13 April, of additional changes which they believe are necessary prior to final consideration at the 15 April meeting.

Executive Secretary

Committee on Overhead Reconnaissance
